

## Foodbuy Delivers on Your Organization's Sustainability Commitments

### MEMBER PROFILE

This Member is recognized as one of America's leading health care providers and not-for-profit health plans. Their integrated model:

Serves +11M Members

Operates 600+ Locations in 8 States plus D.C.

### CHALLENGE

One big concern for this Member is the non-therapeutic use of antibiotics in food production given the continued growth in the number of microorganisms resistant to antibiotics. In an effort to combat this issue, this Member and a number of other healthcare organizations have aligned to a set of criteria under the Healthier Hospitals Initiative (HHI) established by Practice Green Health. This set of criteria provides a framework for healthcare organizations that want to provide sustainable foods to the patients and communities they serve. A key component of this framework is purchasing more local, sustainably-grown food that meets third-party certifications and USDA label claims. As the procurement partner for this healthcare Member, Foodbuy is tasked with meeting certain commitments around reducing antibiotic usage and offering products that meet their specific needs.

### SOLUTION

Foodbuy actively monitors and interacts with suppliers that have sustainability commitments. This interaction includes a biannual review where Foodbuy gathers information to be included on a sustainability scorecard. Through this review process, Foodbuy was able to identify a supplier that had met the CRAU (Certified Responsible Antibiotic Use) threshold. To meet CRAU criteria, poultry producers must minimize their use of antibiotics that are important in human medicine. This helps reduce overall antibiotic use and address concerns of drug-resistant superbugs.\*

### RESULTS:

Foodbuy fulfilled this Member's needs around sustainability, and protected spend with a top poultry supplier that satisfied HHI criteria. In addition, this work can be referenced as Foodbuy continues to look for opportunities to move customers away from non-contracted suppliers to a core contracted supplier that meets their needs around antibiotic use.
